INSTRUCTIONS FOR NSTALLATION AND USE

SCAN Basic 1 & SCAN Basic 3

This manual is accompanied by a pamphlet with General Instructions for Installation.

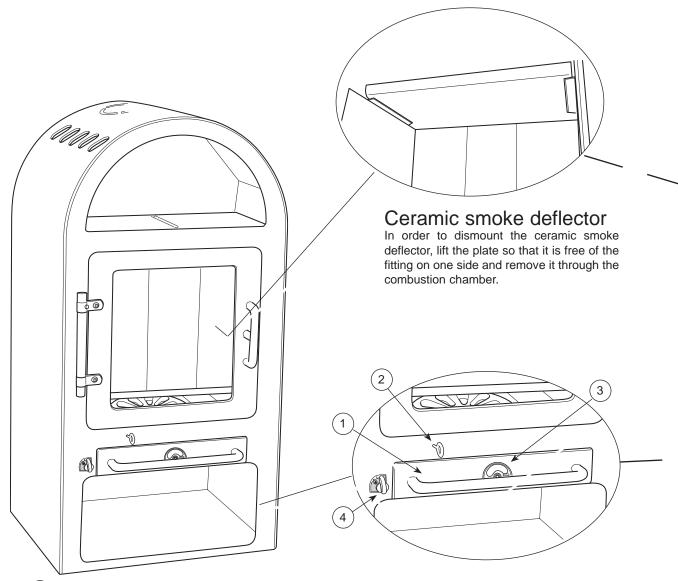

Edition 10.04 - GB

SCAN Basic 1 & SCAN Basic 3

Congratulations on your new SCAN stove!

You have chosen a product from one of Europe's leading manufacturers of wood-burning stoves. We are convinced that your stove will be to your full satisfaction and give you many hours of pleasure if you follow the advice and instructions of this manual.

Please read this manual as well as the General Instructions for Installation before beginning the installation.

- 1 Ashtray. The ashtray is placed below the combustion chamber. Attention! Be careful when you empty ashes from the stove. There may be embers left for up to 24 hours after the stove was last used.
- 2 Handle for shaking grate. The stove is equipped with a shaking grate. When you activate the grate handle, the ashes from the combustion chamber are emptied into the ashtray.
- (3) **Regulation for primary air.** Turn the air valve

in order to open. The primary air is used when lighting and refuelling the stove. It should always be closed during continuous firing.

4 Regulation for combustion air. Push the button sideways. Left position is closed and right position is open. The air is used for the combustion and regulates the output of the stove.

The ashtray, shaking grate, and primary air should always be closed during continuous firing..

Adjustment of the air

	Wood / briquettes	Fuel kg/h (beechwood max. 20% humidity)		
SCAN Basic 1 & 3		2,2 kg		
Combustion air %	75			
Primary air %	0			

SCAN Basic 1 & SCAN Basic 3

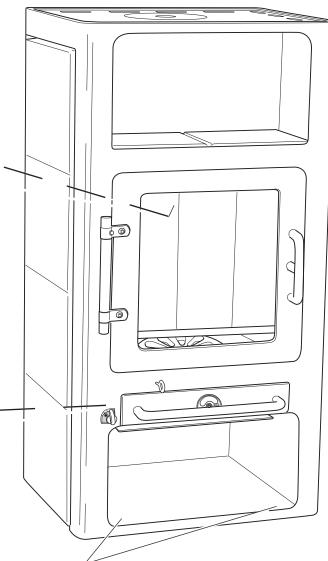

Accessories

For these models you can have the following accessories:

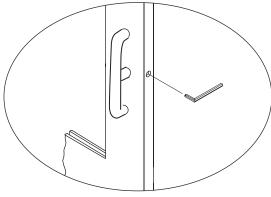

- Lateral covering in soapstone or ceramic tiles (white or blue) for SCAN Basic 3
- Top plate in soapstone for SCAN Basic 3
- Small grill
- Steel floor plate
- Connection piece for fresh-air intake
- Baking-compartment door

The stoves can be prepared for an external air supply where fresh air is let directly into the combustion chamber (must be mounted from the factory).

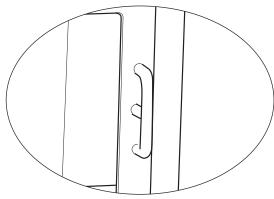

Adjustment screws

The stove has two adjustment screws on the bottom that can be used for levelling the stove.

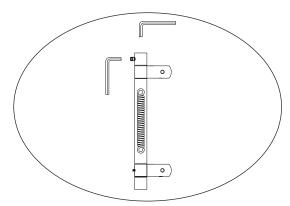

Adjustment of the handle The vertical position of the handle can be

adjusted with the screw in the door frame.

Handle

The door is opened by turning the handle counter-clockwise.

Self-closing door (BA 1)

The door is prepared with a self-closing function at the factory. If you tighten the spring with the hexagon spanner, the door will close automatically when you let go of it.

Data for calculation of the chimney

		With open doors		With closed doors				
Stove model	Connecting adaptor	Density of	2 Flue gas	3 Minimum	4 Density of	5 Flue gas	6 Minimum	7 0,8
SCAN	mm	flue gas flow g/s	ture °C	draft Pa	flue gas flow g/s	o _C	draft Pa	Minimum draft Pa
B1&3	150	23	240	10	6	300	14	11

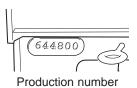

Column 3 and 6 show the lowest/minimum draft in Pa by rated value

Column 7 shows the lowest/minimum draft in Pa by 0.8 x rated value
