

## MINIMUM DISTANCES

### Minimum distance to flammable materials

### Minimum distance to flammable wall protected by a fire wall

Flammable material

Fire wall, e.g. 50 mm Jøtul Firewall, 110 mm brick or other material with corresponding fireproof and insulating abilities

All distances are in mm.

All distances are minimum distances

\* Half-insulated chimney / shielded flue pipe (The requirements to the chimney and the flue pipe in terms of safety distances must be met)
